

Investment Option Summary

ANZ Smart Choice - Global Fixed Interest

31 December 2023

Description

This investment option is designed for investors who want to invest over the medium term with a medium level of risk. This investment option invests in global bond markets.

Investment return objective

This investment option seeks to match the return of the Bloomberg Barclays Global Aggregate Ex-Securitized Index hedged to Australian dollars before taking into account fees, charges and taxes.

Investment strategy

This investment option has exposure to high quality securities (bonds) issued by investment grade governments and corporates from around the world. This investment option aims to hold an appropriate number of securities so as to produce a portfolio risk exposure profile consistent with that of the index. This is generally achieved by holding a representative sample of the securities included in the index. Security weightings in this investment option may vary from the index weightings. This investment option may exclude certain securities that are included in the index or may invest in securities that have been or are expected to be included in the index. This investment option may utilise derivatives to manage market exposure, however, derivatives will not be used to leverage the assets of this investment option. This investment option is hedged to Australian dollars so the value of this investment option is relatively unaffected by currency fluctuations.
