

Investment Option Summary

ANZ Smart Choice MultiSeries 90

31 December 2023

Description

The fund is suitable for investors seeking long-term capital growth through active exposure to a diversified portfolio of growth assets and who are prepared to accept a higher variability of returns.

Investment return objective

To provide capital growth over the long term by investing in a diversified portfolio of predominantly growth assets with minimal defensive asset exposure and to achieve total returns after fees in excess of the benchmark over a rolling seven-year period.

Investment strategy

The investment option gains its exposure to a diversified portfolio of investments through a mix of investment managers. The high growth nature of the investment option provides a majority exposure to growth assets such as property, Australian and international shares and alternative growth, with lesser exposure to defensive assets, such as fixed interest, cash and alternative defensive**. A mix of passive, factor-based and active investment managers may be selected to manage the assets of the investment option providing differing yet complementary investment styles to achieve more consistent excess returns. The investment option is authorised to utilise approved derivative instruments for risk management purposes and investment efficiency. Please note that derivative instruments cannot be used to gear the investment option's exposure. The underlying managers may utilise strategies for the management of currency exposure. It is the strategy of the investment option that international currency exposure may be hedged. The investment option has the capacity to change the level and nature of any currency overlay or allocation to underlying managers to manage currency risk#.
