

# ANZ NET ZERO CARBON

Our purpose at ANZ is to help shape a world where people and communities thrive. A cleaner and less resource-intensive world is good for everyone.

We are taking action to address the risks and opportunities associated with climate change. Since 2010, our business operations have been carbon neutral. We view carbon neutrality as part of an ongoing journey – not a final destination. We've continued to reduce our carbon footprint by over 36,000 tonnes in Australia alone.

Our efforts to achieve and maintain our net zero carbon status has resulted in ANZ offsetting approximately two million tonnes of carbon emissions. This is equivalent to removing more than four hundred thousand cars from the road for one year.

We've continued to invest in carbon offset projects which deliver meaningful and positive environmental and social impacts, and improve the lives of people living in communities across the markets in which we operate.

Over time, we have successfully decoupled our carbon footprint from our business growth. We have been able to maintain a footprint which is no larger than our impact in 2010, despite significant business growth. We have achieved this through consolidating our premises and introducing technologies which help reduce our energy and carbon in our workplaces.

We are also applying the principles of internationally recognised green building schemes to our building design and operation to minimise the impact of our growing digital business.

## WE KNOW THAT BEING A GOOD GLOBAL CITIZEN MAKES GREAT BUSINESS SENSE. THAT'S WHY WE:

- Optimise our facilities' eco-efficiency to achieve carbon, energy, water and waste savings
- Empower our people and communities to contribute to net zero carbon and other environmental initiatives
- Continue to invest in offset projects

We want to enable positive environmental impact through our customers, employees and the communities in which we operate. We understand that business has a key role to play in achieving environmental sustainability, which is one of the reasons we are committed to the United Nations Sustainable Development Goals.
