

ANZ Equity Income Portfolio - Taxable

Investment strategy and approach

The Australian Equity Income Portfolio ('the Portfolio') focuses on identifying and investing in Australian companies with reliable and growing dividend streams with the aim of generating high dividend income and a total return which has lower volatility when compared to the levels experienced by the S&P/ASX 200 Accumulation Index over rolling three year periods.

- To achieve this, the ANZ Investment Management team combines a passive exposure to the 20 companies that comprise the S&P/ASX 20 Index with an actively managed portfolio of 20-30 stocks with the aim of identifying companies that provide a relatively high dividend yield and total return.
- The holdings of the Portfolio are generally comprised of between 40 – 50 securities, predominantly from the 200 ASX listed securities. However, the Investment Manager may invest outside the top 200 companies if it is considered appropriate.
- The Portfolio is invested with a predominant focus on larger capitalised stocks and is structured to have defensive characteristics which preserve capital throughout the complete investment cycle. Such a strategy means that the Portfolio will not capture the performance of the more speculative part of the market, particularly when risk appetite is high as typically experienced in a strongly rising market.
- Likewise our income orientation seeks out consistent and reliable income streams from high quality shares and avoids seeking high yielding companies which may not deliver sustainable yields.
