

# ANZ Dynamic 30 Diversified Portfolio

## Investment strategy and approach

The Dynamic 30 Diversified Portfolio ('the Portfolio') is a diversified portfolio consisting of a combination of Australian shares, an exposure to International share markets, Alternatives, Real Assets, Fixed Income and Cash. The Portfolio dynamically tilts between the asset classes to grow and preserve capital. The Australian shares exposure is gained through a passive exposure to the 20 companies that comprise the S&P/ASX 20 Index, combined with two actively managed portfolios of 10-20 stocks each. The international share portion of the portfolio reflects ANZ's Chief Investment Office and the Private Banking and Advice (PBA) Investment Council's long-term view of international markets and the most appropriate exposures supporting this belief. The Alternative Assets exposure is gained through a Multi-Asset strategy and Real Assets exposure is gained through passive Global Listed Infrastructure and Global Listed Property Funds. The Portfolio will hold cash and cash equivalents for liquidity purposes.

Over the long term, the investment objective of the Portfolio is to outperform Australian domestic inflation, as measured by the CPI, by 1.5% p.a. (before taxes and fees) over rolling 10 year periods.
