6. IMPORTANT INFORMATION

* Interest rates are subject to change without notice and may vary from the rate quoted. Current interest rates are available at our website (anz.com.au/personal/investing-super/investment-loans). Prepayment of interest will be processed upon receipt of payment for existing variable loans, processed upon maturity of existing fixed loans, and processed upon approval of new accounts. Interest rate and interest amount payable may vary from the amount quoted. Quotes are only valid for a period of 24 hours.

The option to pay interest in arrears means that your interest rate will be 0.25% p.a. higher than if you pre-pay interest. This option allows ANZ to debit the interest from your nominated account monthly in arrears.

ANZ Investment Lending will act on this application as soon as we receive it. If for any reason you change your mind around fixing an interest rate after the date of receipt of this form, you may incur costs as calculated in accordance with the ANZ Investment Lending Terms and Conditions. In order for ANZ to fix your rate, it enters into its own arrangements locking in a rate.

At its discretion, ANZ may accept the early repayment of a fixed interest loan but you may be liable to pay:

- An early repayment cost; plus

- The early repayment administration fee,

as calculated by ANZ. Any request to make an early repayment of a fixed interest loan must be received by ANZ prior to 12.00pm Sydney time on a business day, any request received after this time will be actioned on the following business day.

ANZ is not obliged to pay early repayment benefits.

An early repayment cost reflects the cost that may be incurred by ANZ on your early repayment because it reduces the outstanding principal of the loan and thereby reduces the future interest payments that ANZ will receive. This is known as the 'cost of interest foregone'.

The early repayment cost calculation is used to calculate the 'cost of interest foregone'. It compares the net present value of the scheduled cash flows assuming you did not make the early repayment, with cash flows calculated following the early repayment.

The size of any early repayment cost that is calculated will vary according to:

- The size of the early repayment;

- The term remaining on the current fixed interest rate period of your ANZ Fixed Rate Loan; and

- The amount that interest rates have moved since the start of the current fixed rate period on your ANZ Fixed Rate Loan.

Calculation of any early repayment cost will not take into account the balance of any linked investment account.

If you request any change to the loan terms (e.g. loan amount, loan term, interest rate or fixed rate period) of a fixed loan after the 'Fixed Interest Loan Authorisation Form' is lodged but before the loan has commenced with ANZ, a non-utilisation fee of \$300 will be payable by you, in addition to any other break costs incurred by ANZ.

The ANZ Investment Lending Terms and Conditions apply and are available at anz.com.au/personal/investing-super/investment-loans for your information.
