

# Investment Option Summary

## ANZ Smart Choice 1940s

30 September 2018

### Description

This investment option is designed for investors born in the 1940s. Additionally, an active asset allocation process is employed as described in 'Investment strategy' below.

### Investment return objective

Aims to generate retirement capital through returns (after fees, charges and taxes) that on average exceed inflation by at least 1.5% p.a.<sup>#</sup> over rolling 10 year periods, and preserve capital.

### Investment strategy

Provides exposure to a mix of growth and defensive asset classes with a strategic bias to defensive assets. However, in the short term the allocation to growth assets may increase at times and additionally, an active asset allocation process is used to increase or decrease exposure to different asset classes within permitted ranges. This process is designed to optimise investment performance by adjusting allocations to markets/asset classes we believe will perform strongly or poorly in the future.
