

Investment Option Summary

ANZ Smart Choice - Global Fixed Interest

30 June 2020

Description

This investment option is designed for investors who want to invest over the medium term with a medium level of risk. This investment option invests in global bond markets.

Investment return objective

This investment option seeks to match the return of the Bloomberg Barclays Global Aggregate ex-securitized index hedged into Australian dollars before taking into account fees, expenses and tax.

Investment strategy

The index holds high quality securities (bonds) issued by investment grade govt. and corporates from around the world. The investment option aims to hold an appropriate number of securities so as to produce a portfolio risk exposure profile consistent with that of the index. This is generally achieved by holding a representative sample of the securities included in the index. Security weightings in the Fund may vary from the index weightings. The investment option may exclude certain securities that are included in the index or may invest in securities that have been or are expected to be included in the index. The investment option may utilise derivatives to manage market exposure, however derivatives will not be used to leverage the assets of the investment option. The investment option is hedged to AUD so its value is relatively unaffected by currency fluctuations.
