

Investment Option Summary

ANZ Smart Choice Super - MFS Global Equity

30 September 2018

Description

The fund is designed for investors seeking the potential for capital appreciation over the longer term by investing in a diversified portfolio of global shares (unhedged).

Investment return objective

The fund aims to seek capital appreciation over the longer term by investing in a diversified portfolio of global shares (unhedged) and aims to outperform its benchmark (the MSCI World Index (with net dividends reinvested before fees) measured in AUD) over a full market cycle, before taking into account fees and expenses.

Investment strategy

Companies with sustainable above-average growth and returns, and whose prospects are not reflected in their valuation, will outperform over the long run. The value of compounding high returns on capital and above-average growth rates over long time periods is often underestimated by the market.

Through fundamental analysis, MFS seeks to identify enduring businesses, focusing on operational risks and the long-term potential for change. MFS considers whether the valuation reflects the long-term growth and returns of the company, and to what extent it adequately incorporates risk.
