

# Investment Option Summary

## ANZ Smart Choice Super - Walter Scott Global Equity (Hedged)

30 September 2018

### Description

The investment option is suitable for investors seeking the potential for long-term compound returns with a focus on high quality businesses which offer high earnings growth, reduced exposure to foreign currency movements through currency hedging and who are prepared to accept higher variability of returns.

### Investment return objective

The fund seeks to achieve a long-term total return (before fees and expenses) that exceeds the MSCI World ex-Australia Index, in \$A hedged with net dividends reinvested.

### Investment strategy

The fund provides exposure to a concentrated portfolio of global equities by investing in securities which, in Walter Scott's opinion, offer strong and sustained earnings growth by investing in the fund. The fund is actively managed using a benchmark-unaware, fundamental, bottom-up and research driven approach. The portfolio is constructed with a primary focus on stock-based analysis and a bias towards strong growth companies, which Walter Scott believes, are capable of generating high earnings growth. Walter Scott expects that on average, and based on long-term experience, 15 to 25 per cent or less of the stocks in the portfolio will be turned over each year, which reflects their long-term 'buy and hold' approach. The fund may be exposed to derivatives to either obtain or reduce market exposures. It may also use foreign exchange spot contracts to facilitate settlement of stock purposes. The fund's exposure to international assets is hedged by Macquarie Investment Management Global Limited back to AUD.
