* This fund may invest in enhanced cash funds that allow gearing.

† The fund may gain its exposure to Australian shares by investing in one or more underlying Australian share funds. Where the fund invests in the Perpetual Australian Share Fund, that underlying fund invests primarily in Australian listed or soon to be listed shares but may have up to 20% exposure to stocks outside Australia. The investment guidelines showing the fund's maximum investment in international shares do not include this potential additional exposure. Underlying Australian share funds may use short positions as part of their investment strategy. Currency hedges may be used from time to time.

‡ Perpetual may allocate up to 30% of the portfolio to other assets which may include, but is not limited to, infrastructure, mortgages (including mezzanine mortgages), private equity, opportunistic property, absolute return funds, commodities and real return strategies. Exposure to other assets aims to enhance the fund's diversification and may reduce volatility.
