Record run of gains ends

- The nine-week run of consecutive gains has finally ended, with confidence falling 1.3% last week. The weakness was mainly due to 'Time to buy a major household item' component, which declined by 5.7%.
- Financial conditions were mixed. 'Current finances' gained 1.1%, while 'future finances' declined by 0.7%.
- Economic conditions were also mixed with 'current economic conditions' gaining 1.6%, while 'future economic conditions' weakened by 1.6%.
- The four-week moving average for 'inflation expectations' declined by 0.1ppt to 3.2%. This is a historic low.

ANZ-Roy Morgan Consumer Confidence and inflation expectations

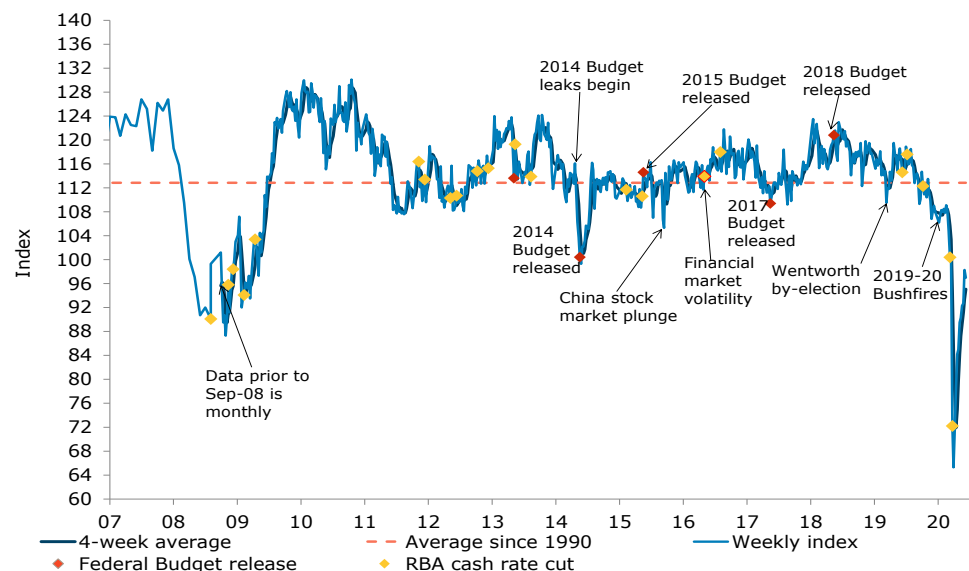

Last weekend (6-7 Jun)	Weekly change, %	Four-week average	Monthly average since 1990	Inflation expectations (four-week ma)
97	-1.3%	95.1	112.9	3.2%

This weekly ANZ-Roy Morgan Australian Consumer Confidence Rating is based on 1,502 interviews conducted online and over the telephone on the weekend. Not seasonally adjusted. Further data history on page 6.

ANZ Head of Australian Economics, David Plank, commented:

Last week's fall in confidence can be seen as more of a consolidating move than weakness, as it has come after the most extended stretch of gains in the history of the weekly survey. Economic conditions and financial conditions were essentially flat in aggregate; a pleasing result given the news (with the publication of the Q1 GDP data) that Australia is almost certainly in a technical recession. The overall weakness in confidence was due to the fall in 'Time to buy a household item'. This sub-index has gained nearly 50% since the low achieved during the height of the pandemic. Weekly 'inflation expectations' remained at the low of 3.1%, taking the four-week average down to a historic low of 3.2%.

Confidence decline 1.3%
