Confidence falls to a record low

- Confidence declined by 9.8% over the past week and is now at its lowest level since the inception of this survey in 1973.
- 'Future financial conditions' was the only subcomponent which was positive, gaining 0.6%. 'Current financial conditions' fell 16.1%.
- 'Current economic conditions' declined by 9.5%, following last week's 37% decline. This is by far the weakest component of the survey. 'Future economic conditions' were a bit calmer, falling just 2.4%.
- 'Time to buy a major household item' fell the most over the past week, dropping by 23.8%. The four-week moving average for 'inflation expectations' was up by 0.1ppt to 4.1%.

ANZ-Roy Morgan Consumer Confidence and inflation expectations

Last weekend (28–29 Mar)	Weekly change, %	Four-week average	Monthly average since 1990	Inflation expectations (four-week ma)
65.3	-9.6%	84.5	113	4.1%

This weekly ANZ-Roy Morgan Consumer Confidence Rating is based on 1,508 interviews conducted online and over the telephone on the weekend. Not seasonally adjusted. Further data history on page 6.

ANZ Head of Australian Economics, David Plank, commented:

Sentiment took a further hit over the past week, falling to the lowest ever level in the almost 50-year history of the survey. There were some glimmers of hope. 'Future finances' were up marginally and inflation expectations rose. In fact, there was a sharp uptick in the weekly reading of inflation expectations, which rose to 4.3%. But we aren't getting carried away. 'Current economic conditions' fell more than 9% and are down close to 50% over two weeks, to the lowest ever level. And most other aspects of the survey are exceptionally weak. The announcement of the largest fiscal package yet may stabilise confidence, but much will depend on the how the pandemic evolves.

Confidence drops to a record low
