ANZ Head of Australian Economics, David Plank, commented:

Consumer confidence recovered with a gain of 1.7% as the weather improved along the east coast, after heavy rainfall and floods wreaked havoc. Confidence rose sharply in Queensland, with a gain of 10.5% in Brisbane and 6.7% in the rest of the state. Sentiment in Queensland may be tested by the emergence of a COVID-19 cluster in Brisbane. NSW was more subdued, with confidence down 0.3% - reflecting perhaps the ongoing impact of the flooding and the sad news that two lives were lost. The rise in overall confidence to almost its long-run average is encouraging and points to the end of JobKeeper being successfully navigated overall, if not without some difficult individual circumstances.
