ANZ Senior Economist, Adelaide Timbrell, commented:

Consumer confidence rose last week but was still below 80 for the 17th straight week, the longest it has been this low since the 1990-91 recession. Confidence in 'Future financial conditions' fell to its weakest since March 2020, ahead of the RBA July meeting, which we expect will include a cash rate increase. Perhaps related to shaky financial confidence, inflation expectations jumped 0.4ppt to 5.9%, its highest since mid-March. But 'Future economic conditions' confidence was at its highest in four weeks. Confidence fell among those paying off their homes, who continue to have much lower confidence than renters and outright owners (the highest-confidence cohort).
