ANZ-Indeed Australian Job Ads: another rise

ANZ-Indeed Australian Job Ads rose 1.7% m/m in January following an upward revision in December to +0.6% m/m from +0.1% m/m. In trend terms, the series fell 0.1% m/m.

ANZ-Indeed Australian Job Ads has fallen 15.5% from the November 2022 peak but is still 39.9% higher than pre-pandemic levels.

	Seasonally adjusted		
	% m/m	% y/y	% vs Feb 2020 (pre-COVID)
ANZ-Indeed Job Ads	+1.7	-13.0	+39.9

See page 4 for [technical details](#)

ANZ Economist, Madeline Dunk: ANZ-Indeed Job Ads has risen 2.3% over the past two months, following a steady decline over the previous 12 months. This stabilisation at a still-elevated level highlights the labour market's resilience. There is no doubt the labour market is cooling, but we do not expect to see a significant downturn anytime soon. NAB's business survey showed 79.9% of businesses reported labour as a constraint on their output in Q4, and the unemployment rate remains historically low at 3.9%, despite a pick-up over the past few months. We expect the unemployment rate to rise modestly to 4.2% by the end of the year.

Indeed Senior Economist, Callam Pickering: In January, the increase in ANZ-Indeed Job Ads was driven primarily by Victoria, which offset weakness in New South Wales and Queensland. That said, the overall decline in postings over the past year remains concentrated in New South Wales and Victoria.

The biggest contributors to January's gain came from management and software development. However, software development also made the biggest subtraction from annual growth, with January's increase ending 10 consecutive monthly declines. Overall, Job Ads in 86% of occupation groups are down over the year.

ANZ-Indeed Australian Job Ads were up 1.7% m/m in January

Appendix

Data sources

The internet series counts the average number of job ads carried by each of the sites contributing to the series on the same day of each week in the month indicated. The day (which is not necessarily the same for each site) is selected by the site operator as broadly representative of its activity levels. The data are based on information provided by the operators of the following sites:

- Indeed (au.indeed.com); 2018–ongoing
- Workforce Australia, Department of Employment and Workplace Relations (workforceaustralia.gov.au) and previous iterations; 1999–ongoing
- SEEK (seek.com.au); 1999–2022
- Newspaper job ads; 1975–2018

Historical data going back to 1975 is published [here](#).

Seasonal adjustment and trend

X-11 ARIMA is used for seasonal adjustment and trend estimates. New and revised original monthly data can result in revisions to the seasonal factors for historical estimates.
