ANZ Infrastructure's Acquisition of 50% of Neerabup Power Station

ANZ Infrastructure Services Ltd announced that on Monday 23 February it completed the acquisition of Babcock & Brown Power's 50% interest in the 330MW Neerabup gas-fired power project located 30km north of Perth in Western Australia.

In November 2008 ANZIS, on behalf of Energy Infrastructure Trust, entered into a purchase agreement with BBP to acquire 50% of Neerabup which BBP held in partnership with ERM Power, a Queensland power development company.

With the addition of this investment, EIT now manages investments in 750MW of wind and gas-fired generation projects in South Australia, Western Australia and Queensland as well as other significant energy assets.

ANZIS is continuing to look for new investments in a number of energy projects throughout Australia.
