ANZ Mobile Pay helps customers tap and pay

ANZ today launched its own mobile payments app giving customers the freedom to tap their phone for purchases and cash withdrawals in a quick and secure format.

Customers with an Android smartphone can download ANZ Mobile Pay from today and turn their phone into a virtual credit or debit card with the broadest range of cards on offer.

ANZ Managing Director Products and Marketing Matt Boss said: "This new app is another demonstration of ANZ's commitment to providing customers with innovative solutions to make their lives easier.

"ANZ Mobile Pay delivers a payments solution for our customers to help them take full advantage of the rapidly changing digital environment we live in, including the ability to withdraw cash from contactless-enabled ANZ ATMs with a tap of their phone.

"Customers using ANZ Mobile Pay will be able to add their existing credit or debit card, and then simply tap their mobile phone for purchases at contactless retail locations anywhere in the world with the security we provide for all online and digital transactions," he said.

"Given Australians are already the most prolific users of contactless payments in the world and the fact that Android is a major player in the local smartphone market, we believe ANZ Mobile Pay will be a popular addition for many of our customers."

ANZ Mobile Pay allows customers to:

- Add a range of ANZ Visa and American Express® credit cards, as well as ANZ Visa Debit cards
- Choose the way you pay with three payment options: Wake to Pay, Launch to Pay and Passcode to Pay
- Enter your PIN for all payments over \$100
- Withdraw money at supported contactless-enabled ANZ ATMs

ANZ Mobile Pay is available for download from the Google Play store from today. Once installed, customers just need to tap their card against the phone, then enter their date of birth and mobile number, and finally choose their preferred payment option.
